Walk-on floor glazing **insulated**

[01.01]

Walk-on floor glazing **SKYFLOOR BF**

Taghell Suisse GmbH

Walk-on floor glazing in accordance with SIA, with visible stainless steel frame (3mm) on all four sides.

Laminated safety glass, glazed into the frame at the factory, ready-to-install, with all-round seal.

Inner frame in white PVC

Standard Float,  $U_g = 1.1 \text{ W/m}^2\text{K}$  (vertical)

Frame height (net) ..... cm (12-15cm)

Outside dimensions in cm: \_\_\_ x \_\_\_ cm / Diameter: \_\_\_ cm

Roof recess in cm: \_\_\_ x \_\_\_ cm / Diameter: \_\_\_ cm

Clear dimensions in cm: \_\_\_ x \_\_\_ cm / Diameter: \_\_\_ cm

If glass is divided, number of divisions: \_\_\_

Number of units:..... PPU: ..... OP: .....

[01.01.01]

Slip-resistant stripes

Taghell Suisse GmbH

Semi-transparent, translucent slip-resistance in strip format (3mm/50%)

Slip resistance tested by the DIN 51130: R10

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.02]

Slip-resistant dots

Taghell Suisse GmbH

Semi-transparent, translucent slip-resistance in dot format (D2mm/28%)

Slip resistance tested by the DIN 51130: R10

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.03]

Slip resistance, full surface

Taghell Suisse GmbH

Translucent slip resistance over the complete surface to obscure the view through the glass

Slip resistance tested by the DIN 51130: R12

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.04]

Connection to building facade

Taghell Suisse GmbH

Completion of the outer frame in matt brushed stainless steel with integrated connection to facade.

Height (according to the customer): ...

Amount in running metres: ..... PPU: ..... OP: .....

[01.01.05]

Inner frame, stainless steel

Taghell Suisse GmbH

Powder-coated version of the inner frame in matt brushed stainless steel

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.06]

Inner frame, powder-coated

Taghell Suisse GmbH

Powder-coated version of the inner frame in matt or gloss, according to customer specifications.

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.07]

Inner frame, stainless steel, mirror polished

Taghell Suisse GmbH

Mirror-polished stainless steel version of the inner frame.

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.08]

Engineering of an incline in the frame

Taghell Suisse GmbH

Engineering of the entire frame with an incline.

Incline: .....% (2% recommended)

Price per running metre, all the way around.

Number of units: ..... PPU: ..... OP: .....

[01.01.09]

Ceramic strips, white

Taghell Suisse GmbH

Edge printing and sealing in white, on all sides, double printing.

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.10]

Triple insulation glazing

Taghell Suisse GmbH

Triple-insulated version of the walk-on floor glazing.

$U_g = 0.6 \text{ W/m}^2\text{K}$  (vertical)

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.11]

Thermal insulating rigid foam frame to compensate height differences / warm roof

Taghell Suisse GmbH

Custom-made insulating frames manufactured from closed-cell rigid foam for full-surface load support, outer dimension correspond to outer dimension of the connection lug.

Installation according to Taghell recommendations, screw connection prepared.

Height: ....mm

Number of units: ..... PPU: ..... OP: .....

[01.01.12]

Insulated profile elevation for inverted roof

Taghell Suisse GmbH

More robust version of the insulated frame for use in inverted roof

Height Skyfloor: ....mm

Total height: ....mm (max.350mm)

Inner frame in white PVC (can also be supplemented with additional stainless steel)

Number of units: ..... PPU: ..... OP: .....

[01.01.13]

Laminated safety glass, heatable (condensation)

Taghell Suisse GmbH

The innermost pane is heatable to prevent the formation of condensation

Can be combined with a sensor control or integrated into building automation.

To be carried out by external contractors and not included in the price:

- Installations such as fuses, switches, etc.
- Power supply of 230V (length of free cable min. 3m)
- Residual-current device (FI 30mA)

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.14]

Laminated safety glass, heatable (thawing)

Taghell Suisse GmbH

The outermost pane is heatable to thaw ice and snow.

Can be combined with a sensor control or integrated into building automation.

To be carried out by external contractors and not included in the price:

- Installations such as fuses, switches, etc.
- Power supply of 230V (length of free cable min. 3m)
- Residual-current device (FI 30mA)

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.15]

Laminated safety glass, heatable (condensation and thawing)

Taghell Suisse GmbH

The innermost and outermost panes are heatable to prevent the formation of condensation and to thaw ice and snow.

Can be combined with a sensor control or integrated into building automation.

To be carried out by external contractors and not included in the price:

- Installations such as fuses, switches, etc.
- Power supply of 230V (length of free cable min. 3m)
- Residual-current device (FI 30mA)

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[01.01.16]

Privacy glazing

Taghell Suisse GmbH

Film coating on laminated safety glass, obscures the view both inwards and outwards

Price per section of glass.

Number of units: ..... PPU: ..... OP: .....

[02.01.01]

On-site measurements prior to installation of Skyfloor BF, carried out by Taghell

Taghell Suisse GmbH

Precise recording of relevant measurements taken on-site by Taghell, for preparation of the manufacturing design.

Pre-requisite: it must be possible to take all the measurements. Final height and dimensions cannot be altered at a later point.

Measuring carried out in one site visit.

Amount, in units: ..... PPU: ..... OP: .....

[02.01.02]

Installation of Skyfloor BF

Taghell Suisse GmbH

Horizontal aligning of Skyfloor incl. shifting to exact height (max. 2cm).

If necessary, the height and slope of the support (min. 150 mm/level) is created by a slope cover provided by the customer. Skylights are to be transported to the shoring site in advance by the customer. Crane to be provided by customer. Assembly is carried out in one operation.

Not included in the mounting are the inner and outer sealing to the building structure.

Amount in units: ..... PPU: ..... OP: .....

[02.01.03]

Packaging and protection of Skyfloor

Taghell Suisse GmbH

Protection of the skylight by means of a custom-made wooden structure to protect the skylight during the further construction process.

Amount in m<sup>2</sup>: ..... PPU: ..... OP: .....

[02.01.04]

Transport packaging for Skyfloor

Taghell Suisse GmbH

Packing of the Skyfloor for transport via freight forwarder or customer self-pickup.

Amount in m<sup>2</sup>: ..... PPU: ..... OP: .....

[02.01.05]

Shipping costs

Taghell Suisse GmbH

Transport with logistics company ex works Taghell to delivery address.

Unloading by customer. Transport time 4-7 working days.

Amount in m<sup>2</sup>: ..... PPU: ..... OP: .....
